## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

**Claims 1-8, 10-11, 13-14, 29, 31-37, and 48 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.**

Applicant has argued that the functional limitation regarding coloring indicates 2 conditions- 1- that the index of refraction dispersion between 650 and 450 is in a range of .020-.025, and that the delta n is in the range of .070-.095. Unfortunately, the claims include explicit broader ranges. If applicants interpretation of the claim is employed, a broad range and a narrow range both exist in the claims., rendering the claims indefinite.

Regarding the conventionality of the claimed ranges and the matching of the index of refraction, the evidence regarding TN type cells is overwhelming. Numerous references have been cited, and more can be cited. To further establish the assertion that these were the typical values at the time of invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10

USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949).

### ***Response to Arguments***

Applicant's arguments filed have been fully considered but are moot in view of the new grounds of rejection. Regarding the old rejections previously presented, The tilted retarders found with a middle value index tilted to the plane (the Fuji reference) focused on STN and taught away from TN. As the conventionality arguments presented by the Examiner were correct only for TN devices, those rejections have been dropped.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth A Parker whose telephone number is 703-305-6202. The examiner can normally be reached on 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert H. Kim can be reached on 305-3492. The fax phone numbers for the
